

FishView

User Guide

Thank you for choosing FishView!

This guide will walk you through a quick and safe installation. We hope FishView will bring you many joyful moments.

What's in the box

- Plexiglass dome

- Polycarbonate base

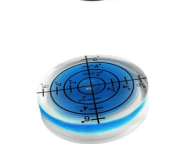

- x3 Aluminum legs

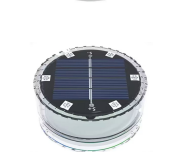

- x3 Rubber feet

- Bubble level

- Waterproof solar lamp

Installation Base

- 1** Insert the legs into the base and adjust the length depending on your pond depth.

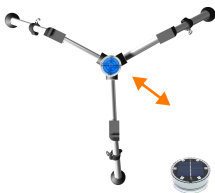

- 2** Tighten the 3 bolts; they are already inserted.

- 3** Place the base into the pond, it should be ~5 cm under the water.

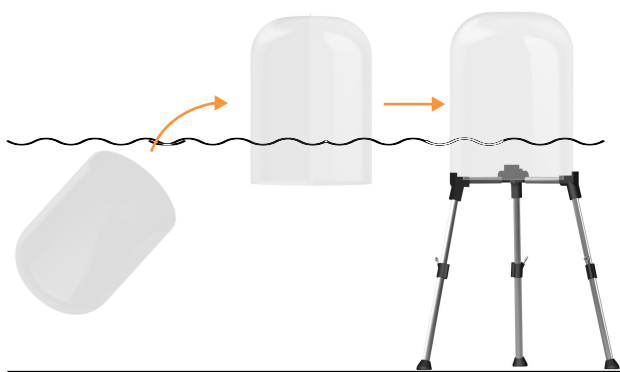

- 4** Level the bubble in the center to make sure its even, then replace it with an LED lamp or GoPro.

Installation Dome

- 5 Fill the dome with pond water and hold it upright. Ensure no air bubbles remain inside. Place it on the base while keeping the edges fully submerged

Helping Fish Discover the Dome

Fish may need **a few days to explore** the dome. To speed this up, place **floating food pellets** inside to attract them, and keep the dome in **one spot**. A **sunny location** helps too, as fish enjoy warmer water.

Important Notes

- Monitor how fish and other animals interact with the dome to **ensure their safety**.
- Fish may take a **few days or more to start using the dome**.
- Remove if freezing or severe weather is expected.
- Clean only with soft microfiber cloths and **avoid scratching**.
- Do **not lean, sit, or place heavy** objects on the dome.

Specifications

Dome	25 cm x 45 cm, 22 L, UV-resistant clear plexiglass
Base	Legs 35–60 cm, aluminum with 3D-printed connectors
Weight	2.5 kg
Fish	Suitable for fish under 20 cm
Pond	Depth 45–90 cm, temperature above 0 °C

About

Invented in **Ukraine** and produced in the **Netherlands**, it is the world's first dome for observing fish from above. Founded in 2025, it is my first business, and I hope it brings beauty and a new perspective to your pond.

Your feedback is highly valuable, please reach out to share your experience!
